**Re: Policy Letter, Use of Amateur Radio within the CT Wing CAP**

I need to clarify some things regarding the use of Amateur Radio while on Civil Air Patrol Activities.

Until further notice, NO Amateur radio operations will take place using personal that are signed on a mission, whether practice or actual. If you are on the 103, you can not use amateur radio for ANY communications. If you do, you may be endangering your Amateur Radio License.

I'm sorry to cut off this avenue, but at the present time, I need to get some regulatory clarifications. Check the National Web Site regarding the FAQ about Amateur Radio usage.
